

ANNOUNCING TWO FREE WEBINARS

Presented by The National Work Zone Safety Information Clearinghouse

A Tutorial on Establishing Effective Work Zone Performance Measures

October 27, 1 PM-2:30 PM EST

Tracy Scriba, FHWA Office of Operations

Jerry Ullman, Texas Transportation Institute

This webinar will introduce the participant to the reasons that work zone performance measures should be established, describe a general process that agencies can follow to establish work zone performance measures that are useful to them, and provide several examples of how agencies can start computing work zone performance measures from the data they may have available or can easily collect.

Guidance on Managing Speeds in Work Zones

November 30, 1-2:30 PM EST

Melisa D. Finley, P.E., Texas Transportation Institute

The determination of work zone speed limits is typically based on state laws, agency policies and engineering judgment. Many factors impact the decision to reduce the regulatory speed limit in a work zone, implement speed limit management strategies and utilize speed reduction strategies.

The information presented in this webinar should aid agencies and highway contractors in understanding these factors and the interaction among them.
